JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

was isolated on board with an attendant. On arrival the vessel was taken to the quarantine station, the patient was removed, and the entire personnel were vaccinated. The crew were held in quarantine while in port. They were bathed and their clothing was disinfected. The hospital and quarters of crew were disinfected.

### HONDURAS.

#### PUERTO CORTEZ, Fruit Port—Sanitary Conditions.

Acting Assistant Surgeon Stowe reports, May 10:

The sanitary condition of the port and surrounding country is good and there are no quarantinable diseases present. The work of draining and filling in the town has been discontinued since last year.

There are about 200 overground cisterns in use, the majority of which are either unscreened or ineffectually screened. A few householders oil their cisterns. Mosquitoes are not numerous, those present being for the most part *Culex*.

### ITALY.

#### NAPLES—Examination of Emigrants—Smallpox and Typhus Fever.
